STEP 3A:

-Using Mobile-

Buy Crypto Through MetaMask

ABOUT THIS GUIDE

In this guide we are going to show you how to purchase crypto in your MetaMask account on your phone using a credit card, so that we can then bridge this crypto to your DAO1 account (covered in next guide).

USDT ERC20 or USDT BNB can be purchased. This guide will demonstrate how to purchase USDT Erc20.

NOTE ABOUT FEES: Exchanges and crypto wallets will charge fees for different services and transactions, so ensure you transfer enough to cover these fees.

1: Open MetaMask Portfolio

Open your MetaMask app on your phone, and ensuring the correct account is showing at the top (the one you have connected to DAO1), press the 'Portfolio' button.

The below screen will open. Press the blue 'Open MetaMask' button, and you will be asked to give permission for this connection. Ensure that the account that is being requested is the one you have connected to DAO1 (this is why we always suggest naming your account something obvious). If it is not the correct MetaMask account, press 'Edit' next to it, and select the correct one. Then press the 'Connect' button below.

2: Go To Buy And Select Network

From the portfolio dashboard press the three lines in the top right corner, and then click the 'Buy' button.

Ensure you are on the Ethereum network (press 'switch' next to 'Ethereum Main Network' if you are not).

3: Select Crypto Coin And Amount To Purchase

Select your region, and then how you want to pay (for this example we are using credit card).

IMPORTANT: Double check all your details on this next page.

Ethereum network (This is crucial as you will be sending this coin on the Ethereum network).

The correct MetaMask account.

Tether USD (Ethereum will likely be the default coin selected. Click on that box and then search for USDT token in the dropdown).

The amount you want to purchase.

Payment Method.

Click 'Get quotes'.

4: Choose Your Provider

MetaMask will fetch quotes from different providers. There are several providers who can purchase crypto through in MetaMask. The best rates at any given time will be shown to you. For this example we are using MoonPay, although the process with other providers is very similar. Make sure you do your own research and select the provider that is right for you.

Steps on how to process your payment with MoonPay are on the next page. Be aware the process will be slightly different with different providers.

4: Checkout With Moonpay

Follow these prompts (left to right) to complete ID check.

Checkout with MoonPay
The easy way to buy, sell, and swap crypto safely
Trusted by 20M+ people, Rated 4.3/5 on TrustPilot.

We need to verify your identity
Before you can buy USD, we'll need to verify who you are. We use end-to-end encryption to make sure your data is always safely handled. Next, we'll ask you to do the following:

Upload your photo ID
Driver's license works best for verification in your country.

Do a liveness check
We'll scan your face to check it against your photo ID and make sure you're really the owner of it.

Continue

Tell us where you're from
Select your country of residence to learn how your personal data will be processed.

All countries except USA
United States of America

Your verification is in progress!
This should take around 60 seconds. You'll be able to finish your purchase right after. We'll send you an email when your verification is complete.

Continue

Confirm your order
Some banks may decide to decline any transaction involving crypto. If this happens to you, please contact your bank for more details.

Paying with
Visa ****9322

Sending USD to
0x8e26...b8abfe

You get 6133 USD for A\$100.00

Pay A\$100.00

One final security check
Crypto transactions are irreversible. We're here to help you protect yourself from scams.

STOP IF
Someone gave you a link to make this purchase
Someone you met on social media is guiding you to invest in USD
Someone showed you an investment website to use that you haven't heard of before

Confirm order

You will be redirected back to MetaMask where the transaction is processing. This may take a few minutes to complete. Once the transaction is successful your USDT will be visible in your MetaMask wallet.

Processing transaction

Your order for USDT is processing. Card purchases may take a few minutes to complete.
